Student Assessment

Session 6
Sharing Lessons and Experiences in Assessment Projects

February 7, 2013
Room I2-220
Washington, DC
The good, the bad,...and the ugly
Session overview

• Recognize and understand key factors that have determined the success or failure of assessment projects

• Distil lessons and guidelines for future projects from these experiences
Presentations
Presentation outline

Description
- What was the project about?
- Why was it important?

Challenges
- What were the main challenges in designing and implementing the project?
- Did it work as planned? What were the main mistakes?

Lessons
- What recommendations would you give to TTLs who are going to be involved in similar assessment projects in the future?
Table discussion
Activity: Challenges and solutions in assessment projects

• In your group
  – Listen to the description of the assessment project
  – If the project is already completed
    • Identify together the key lessons learned from the challenges or bottlenecks faced
  – If the project is ongoing
    • Identify together the key challenges or bottlenecks and suggest how they might be solved

• Report back
Conclusion

• Summary discussion
  – Identifying key lessons and guidelines
• Review of World Bank support for assessment activities in client countries, 1998-2009
  – Lessons, guidelines
  – Flashcard
