Feedback from TTLs

1. Background and benefits:

- Briefly share how you have used EO4SD-Urban EO data/products in your programme and in your experience, share what were the key benefits of using EO data?

2. Challenges:

- Please present your perspectives on any challenges you/the project encountered and how they were overcome?

3. Integration, replication and expansion of EO data:

- Can you share your views or how the World Bank could optimise the use of EO for Urban programmes?

Round Table Discussion: Key Issues

What is required for mainstreaming EO into urban development programmes?

- **Move away from project-based case by case scenarios?**
 - Longer and deeper engagements/collaboration with Bank programmes which allow better translation of user requirements and understanding of EO solutions?
- **Continue and strengthen capacity building and awareness raising?**
- **Improved financing of EO in Development programmes?**
 - Technical knowledge on the application of EO and the related costs required by Banks and City counterparts?
 - Information on cost-efficiency of EO required?
